PREFACE

Purpose of the Repair Parts Scale (RPS)

1. This Repair Parts Scale (RPS) is an entitlement document prepared by the Defence Materiel Organisation (DMO), National Fleet Manager (NFM) of the equipment. It authorises Units, Technical Support Sub-Units and Workshops that have the responsibility, the trade qualified personnel and the facilities, to draw Repair Parts for the repair and maintenance of the equipment detailed within the RPS.

Basis of Scale

2. The RPS is assessed on the premise that a repair part is any essential component or accessory which, through deterioration, breakage, normal wear and tear or loss, is likely to require replacement during the expected life of the equipment, and is an item which could not be economically repaired or fabricated in workshops.

3. The range and breadth of repair parts listed in the RPS is based on the grades of repair authorised for the equipment.

Recommended Stocking Quantities

4. The scale or depth of repair parts (also known as stocking quantities) are not listed in the RPS.

5. A Recommended Stocking Quantities report for units or force scaling for deployments and exercises maybe obtained from the NFM of the equipment.

6. The following information is to be supplied with each Stocking Quantity Report request:

- a.** RPS Number(s);
- b.** equipment asset NATO Stock Number(s) (NSN) or Entitlement Group Cod (EGC);
- c.** equipment asset name(s);
- d.** number of equipment to be supported;
- e.** duration of the support in months;
- f.** the grade of repair at which the support is to be provided ie Light (L), Medium (M) and Heavy (H);
- g.** type of forecast required if more than one equipment is involved (ie a single forecast per equipment or a consolidated report listing all equipment in one report); and the date the report is required by.

Access to RPS On-line

7. RPS can be accessed for viewing on-line at <http://vbmweb.sor.defence.gov.au/techdata>. The RPS on this site can be Printed and Saved, but when printed or saved they are Uncontrolled Copy.

Additional Copies of RPS or RPS Index

8. Personnel authorised by their unit to request additional copies of RPS can do so by contacting the NFM of the equipment.

New Issues and Distribution

9. New RPS and new Issues of RPS are distributed automatically by the NFM to authorised recipients.

10. When a new Issue of an RPS is released it supersedes all previous Issues, copies of which should be disposed of in accordance with current authorised procedures.

Delivery Address for RPS

11. Unless special circumstances exist, RPS will not be addressed or sent to an individual but will be delivered to the Unit or Sub Unit address (eg. 7 Sig Regt or 3 RAR Tech Spt). Personnel requesting an RPS are to ensure that they are authorised to submit the request and that the receiving Unit or Sub Unit will complete the internal delivery.

General Inquiries

12. For general enquiries in respect of an RPS contact the appropriate NFM of the equipment.

Changes to RPS and Scales Change Request

- 13.** Amendments to an RPS will normally be made in the form of a new issue.
- 14.** Units can propose changes or amendments to an RPS by submitting Publication Improvement Report and Reply (PIRR) form (AO011) to the appropriate NFM of the equipment.
- 15.** A sample PIRR can be found in the front of every RPS. An electronic copy of the PIRR form (AO011) is available on Webforms and should be filled out and submitted to the appropriate NFM of the equipment.
- 16.** A PIRR form (AO011) may be raised by:
 - a.** units, repair elements, logistic units and headquarters who find, through user experience, the scale is inadequate either by range or quantity of repair parts;
 - b.** units, repair elements, logistic units and headquarters who consider previously non-scaled items could become a recurring requirement; or
 - c.** personnel who have identified errors or omissions in the text or illustrations.
- 17.** A PIRR form Scales will be acknowledged by the NFM of the equipment. If a change is approved, then users will be notified in the form of an interim (pen) amendment. The change will then be incorporated in the next issue of the RPS.
- 18.** It is emphasised that units, repair elements and logistic units are free to adjust their holdings as soon as user experience indicates the need. Adjustment action does not require prior approval of a PIRR form. The latter is required by NFM so that the RPS database may be updated to reflect the latest information. This data may then be used for subsequent stocking quantity reports, reflecting the latest usage data.

How to Use the RPS

- 19.** Refer to the Group Index in the Contents page of the RPS to locate the starting page number of the group required.
- 20.** Refer to the group illustration and identify the item required by its callout number.
- 21.** Refer to the text page the callout number of the item required is listed in the column titled ITEM NO. Information for each item is listed in the columns titled.

DESIGNATION

NSN

MANUFACTURER CODE / PART NO

SUPPLIER CODE / PART NO

NO OFF (per assembly)

UOI (unit of issue)

EXP (stock type), and

L* M* H* (grade of repair details.)

Illustrated Items

- 22.** All illustrated items have an accompanying Item number in column 1 of that group's text page (eg AAB007 indicates callout number 7 on the illustration for group AAB).

Non-illustrated Items

- 23.** All non-illustrated items within a group are identified by having an Item number of 901 (formerly 9001) or greater (eg AAB 901 indicates the first unillustrated item within group AAB, AAB 902 the second and so on). The non-illustrated item numbering system has been changed to comply with the requirements of the Military Integrated Logistics Information System (MILIS) Associated Documents.

Scaled Items

- 24.** Scaled items are indicated as such by having the letters 'L', 'M' or 'H' in the grade of repair column, and a NSN in the NSN column.

25. In some instances, particularly for first issue RPS, items intended to be scaled may not have a NSN listed but will be identified for repair by 'L', 'M' or 'H' in the grade of repair column. As soon as cataloguing action is completed for these items, a new issue of the RPS will be released.

Non-scaled Items

26. Non-scaled items have the grade of repair column blank, do not have an NSN and therefore do not appear in the NIIN index.

27. Requests for non-scaled items are to be carefully examined by units' technical support sub-units, workshops and contract repair elements. Requests for non-scaled items should be directed to the applicable National Fleet Manager.

Manufacturers' and Suppliers' Codes and Part Numbers

28. Prime manufacturers' codes and part numbers, if available, will appear directly below the NSN field. If not available, the field will read 'NIL' or be blank. The next higher assembly should be requested for items with 'NIL'.

29. Suppliers' codes and part numbers, if available, will appear directly below the prime manufacturers' code and part number field. If not available, the field will be a duplicate of the manufacturer's code and part number.

**TO AVOID SERIOUS DAMAGE,
REMOVE AXLES OR PROPELLER
SHAFTS BEFORE TOWING**

X 50 RU 242

11

WARNING

BEFORE STARTING ENGINE, to prevent vehicle from suddenly jumping and to avoid personal injury/driveline damage, make sure parking brakes are applied, push in clutch pedal and place gear shift in neutral.

Avoid turbocharger damage when starting engine by NOT running engine above 1400 rpm UNTIL oil pressure is over 20 psi (138 kPa).

To avoid driveline damage, do NOT attempt to move vehicle when parking brake lamp is on.

Engine operation range is 1200 - 2100 rpm. Prevent drivetrain damage by NOT running engine over 2300 rpm.

BEFORE STOPPING ENGINE, to avoid turbocharger damage, idle engine 3 minutes.

10

STARTING INSTRUCTIONS

PARKING BRAKE MUST BE APPLIED FOR STARTING. TO ASSURE ADEQUATE TURBOCHARGER LUBRICATION ENGINE SPEED SHOULD NOT EXCEED 1400 R.P.M UNTIL OIL PRESSURE EXCEEDS 140 K.P.a (20 P.S.)

BATTERY SERVICE WARNING
THIS IS A NEGATIVE GROUND SYS.
1.BATTERY CABLES ARE COLOR CODED
RED-POSITIVE, BLACK-NEGATIVE
REVERSING CONNECTIONS WILL DAMAGE
ELECTRONIC COMPONENTS
2.CONNECT POSITIVE TO POSITIVE,
NEGATIVE TO NEGATIVE, WHEN BOOSTER
BATTERIES ARE NEGATIVE FOR STARTING
3.DISCONNECT BATTERIES AND ALTER
BEFORE WELDING OR USING FAST CHARGER
4MR2351-P1

CAUTION
THIS UNIT IS FITTED
WITH ALTERNATOR.
BATTERY LEADS MUST
BE DISCONNECTED
BEFORE WELDING
X4MR112

CAUTION

THIS COOLING SYSTEM CONTAINS
25% ETHYLENE GLYCOL MIXTURE.
MAINTAIN A SPECIFIC GRAVITY OF
1-043 AT 15°
CHECK WITH HYDROMETER
X50 RU 258

CAUTION

DO NOT OPERATE VEHICLE WITH
LESS THAN 4.5 x 100 Kpa OR
SUSPENSION DAMAGE MAY OCCUR
